Gregorio Boada
SOFTWARE DEVELOPER | PHP & Laravel Specialist

Profile

A results-driven Software Developer with over 10 years of experience specializing in building robust and scalable web applications with PHP and the Laravel framework. My background includes leading development teams, designing efficient software architectures, and managing end-to-end project lifecycles. I am committed to continuous learning and leveraging modern technologies to deliver high-impact solutions.

- **Languages & Frameworks:** PHP, Laravel, Python, JavaScript, TypeScript, NodeJS, Angular2+, Vue, React, Fastapi, CodeIgniter
- **Databases:** MySQL, MariaDB, PostgreSQL
- **Tools & Platforms:** Git, Docker, OpenAPI, Swagger, Socket.io, API, WebSockets, Slack, Magento

---

Professional Experience

Backend Developer | Tiket Go OÚ
(July 2024 – March 2025)

- Currently developing the backend for a new platform, focusing on creating a solid and scalable foundation to support future business features.
- **Technologies:** PHP, Laravel, MySQL, Swagger, Socket.io, Slack

Software Developer | **Freelancer**

(April 2024 – May 2024)

- Developed and implemented custom solutions for various clients, managing the full project lifecycle independently to meet deadlines and requirements.

- **Technologies:** PHP, Laravel, JavaScript, NodeJS, React, MySQL, API

Programmer Analyst | **GL Satelital**

(January 2023 – October 2023)

- Led the modernization of the company's monitoring system by developing a new frontend in Angular 12 and a robust backend in Laravel 8, significantly improving user experience and system performance.

- Designed and developed a new API using Laravel 9 to integrate management systems, centralizing administration and enhancing inter-service communication.

- **Technologies:** PHP, Laravel, JavaScript, NodeJS, Angular2+, PostgreSQL, TypeScript, API, WebSockets, Socket.io

Programmer Analyst | **Klikealo**

(September 2020 – December 2022)

- Developed a bridge API between the Retail Pro ERP and the Vtex e-commerce platform, automating product creation and synchronization, which reduced manual management time by 40%.

- Implemented a medical appointment scheduling system with Laravel 8, improving patient management for a client organization.

- **Technologies:** PHP, JavaScript, Angular2+, MySQL, API, Git, GitLab, Magento, CodeIgniter

Programmer Analyst | **Geor**

(October 2019 – April 2020)

- Managed a team of 6 developers in maintaining an electronic invoicing system, enhancing team efficiency through strategic task delegation and best practice implementation.

- Supervised the development of a new API (v.2) for the invoicing system, introducing key features like accounting report generation to deliver greater client value.

- **Technologies:** PHP, Laravel, JavaScript, Vue, MySQL, API, Git
